

Generation cost saved at the same attained quality

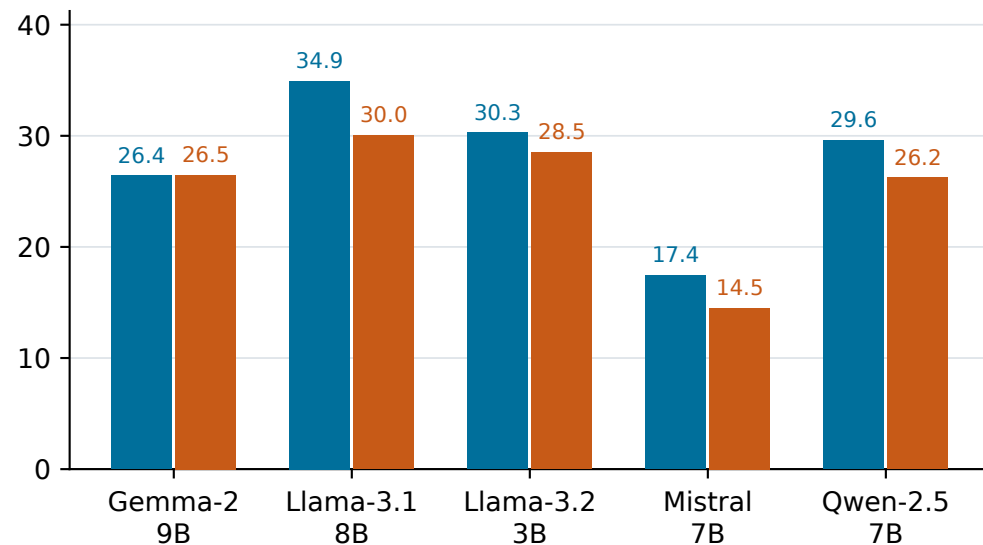

FSFairX reward model Mistral reward model

Overall means: FSAirX 27.73% | Mistral 25.15%

By generation price · mean over five generators

By generation model · mean over six prices

Comparator: cheapest retrospective fixed-N mixture matching each price-based policy's attained quality.

Alpaca · 100 prompts/generator · 8 replay orders · 5 overlapping splits · descriptive means, not independent trials.

Savings at attained quality do not imply reliable control of a requested quality target.
